

A Message From the Chairman

Do you have trouble keeping up with the latest advances in technology? Do you feel like the modern world is leaving you behind? Have no fear! The boffins at OVFM have been burning the midnight candle (I mean energy saving light bulbs!) to bring you the answer.

We think it's important to preserve those precious and important milestone moments in life. From weddings to new babies, from once-in-a-lifetime holidays to fascinating hobbies, they all deserve to be recorded and preserved for the benefit and entertainment of generations to come.

But sadly this potential gold dust often ends up languishing neglected or unaccessible. Whether it's old 8mm cine film, video tape or digital files on your computer harddrive OVFM encourage you to metaphorically brush off the cobwebs and dig for the gold.

We at OVFM will be holding a number of FREE coaching sessions for people to learn how to make the best of their material. Whether you use a smart phone, tablet, laptop, digital camera or good old camcorder we will show you how to produce polished films to be proud of and which are every bit as worthy of keeping as our priceless old family photo albums. Seek out those old home movies and slides and bring them back to life with the great technology that is now available. You'll be amazed what can be done.

Come along and learn how to film, edit and preserve your memories for posterity. Do you know anyone who might be interested? Spread the word and help us rid the world of the 'shoot it and forget about it' mentality!

*Simon Earwicker
Chairman Orpington Video and Film Makers*
